Kohlenberg Lyceum Series Presents "A Streetcar Named Desire"

Williams' work have a universal and timeless appeal, and his insights into human behavior are nothing short of miraculous. He recognized that we are part angel and part beast and it is this conflict

The Truman Bookstore is a platinum level sponsor and a special guest at this performance.

Tickets are free for Truman students, faculty and staff and are available beginning Feb. 23 in the Student Activities Board Office or in the Center for Student Involvement. Gillette Featured as Technology Champion

David Gillette, professor of economics, is this week's featured Technology Champion. Gillette has been a regular user of technology in his teaching for many years and considers it a significant tool in both preparing material for class and delivering information to his students.

Student evaluations of Gillette's classes show that they appreciate the clarity and organization that technology brings to presentations and handouts. The key to effective use of technology for Gillette is integration, and he uses a variety of software in his teaching: BlackBoard, web authoring tools, Power Point, HyperStudio and office suite products are among his areas of expertise.

Most important, using technology to distribute information, assignments and materials to his students frees Gillette to use valuable classroom time to engage them on a more personal level.

"My teaching is more natural and conversational and I am able to make greater eye contact during class with each student, our interactions are richer because I am not worried about delivering information," Gillette said.

Gillette believes that technology has had a strong positive impact on his teaching.

To contact Gillette about the use of technology in teaching, call 785.4334 or e-mail him at gillette@truman.edu.
