Alumnus Means Business

Bill Newbury the year marked the first time in the fraternity's history that two students from the same university were selected Collegian of the Year during consecutive years. This year, alumnus Bill Newbury and Iota Nu have once again rewritten the record books.

Newbury was selected the 1987 National Collegian of the Year by Delta Sigma Pi professional business fraternity making him the third Northeast student chosen for the honor in the past three consecutive years. Last year, Susan Plasmeyer was selected, and in

1986, NMSU's Delta Sigma Pi chapter, Iota Nu, was the first chapter to win the Most Outstanding Chapter Award twice, having won it in 1981 also; and

1985, Karen (Kettler) Gratza won the national honor.

"Some think there is a trick [to winning consecutive years]; I don't think it is a trick, we have a good chapter," Newbury said. "I was pleased that the selection process was such that they did not discount us just because we had won before."

While at Northeast, Newbury majored in business with an emphasis in finance. He was a Pershing Scholar, a member of the Student Activities Board, Blue Key national honor fraternity and the Showboat Gamblers marching band. As a member of Delta Sigma Pi, Newbury played an active role, serving as the fraternity's treasurer and president.

Established in 1971, the award is based on scholarship, extracurricular activities, fraternity involvement, demonstration of responsibility to self and others and

representation of conduct according to business ethics and integrity.

As collegian of the year, Newbury will serve on the National Executive Committee for two years. At the fraternity's national convention held in New Orleans last August, he also received a plaque and a \$2,500 scholarship to be used for graduate school within the next five years.

Newbury is currently working in the contract department at McDonnell Douglas in St. Louis. In February, however, he will journey to Australia to begin a year of studying economics and Asian culture, made possible by a Rotary Scholarship he won earlier this year.

Although he has no definite plans after he returns from "down under," his goals include working with international business and trade between the United States and Japan.

Appointment sign-up for students, faculty and staff individual year-book pictures will be from 8:30 a.m.-4:30 p.m., Sept. 14-18, 2nd floor of the Student Union Building. Pictures will be taken Sept. 21-Oct. 1 free of charge.

President's Distinguished Scholar Day Set for Saturday

The eighth annual President's Distinguished Scholar Day is scheduled for Saturday. Last year 525 students and 550 parents participated in the PDS day. An equally large number of participants is expected this year. This event brings high school seniors to Northeast to preview academic programs and campus life. Participants are also given the opportunity to take competitive examinations for full-ride and partial scholarships to NMSU.

Rainmakers Perform at NMSU

The Rainmakers, an up-and-coming band from Kansas City, will play on the NMSU campus Friday, Sept. 25, in Baldwin Auditorium. Cost is \$7 or \$4 with an SAB sticker. The performance is co-sponsored by the Student Activities Board and KTUF.

Former Northeast Guests Marry

Dr. Robert Jarvik, inventor of the Jarvik 7 artificial human heart, and Marilyn Mach Vos Savant, listed in the Guinness Book of World Records as having the highest I.Q. in the world at 228.33, were recently married in New York. The couple

appeared on the NMSU campus last November when Vos Savant presented a lecture titled "You Forgot Your Parachute," or "Jumping to Conclusions." Jarvik accompanied Vos Savant on her visit. (UPI photo)

Author James Dickey Presents Readings

James Dickey, regarded as one of the leading authors of our time, will read from his major works at 8 p.m., Friday, in Baldwin Auditorium. Dickey's appearance, which is co-sponsored by the Division of

Language and Literature, opens the 1987-88 Lyceum Series.

Dickey's first novel, "Deliverance," was a national bestseller and was later made into a major motion picture. The 1970 work became a critical and popular success.

Time magazine wrote that "Deliverance" overflowed with "descriptive power not often matched in contemporary American writing."

After 17 years since his last novel, the introduction of Dickey's new novel "Alnilam" this year was regarded as one of the major literary events of 1987.

Publishers Weekly praised "Alnilam" as the product of "a

vastly talented author extending himself and creating a world few writers could even imagine."

Dickey has written nearly thirty volumes of poetry and criticism, including the 1965 collection, "Buckdancer's Choice," which won the National Book Award for Poetry. His other volumes of poetry include "Puella," "The Zodiac" and "The Strength of Fields." Dickey is the recipient of a Guggenheim fellowship, and he served as Consultant in Poetry at the Library of Congress from 1966-68. He is currently the poet-in-residence and Carolina Professor at the University of South Carolina-Columbia.

Art Gallery Features Exhibition by Peace

An exhibition of paintings by Bernie Peace of West Liberty State College, West Liberty, W.Va., will be on display until Oct. 16, at the NMSU Art Gallery, Baldwin Hall 218. Peace is a native of Kentucky with an A.B. degree from Berea College and an M.F.A. degree from Indiana University-Bloomington. He has been a professor of art at West

Liberty since 1960.

Peace's work has evolved from abstract expression to very colorful shaped canvases with much of his effort bordering on minimalism.

Peace's exhibition is the first show of the 1987-88 academic year. The gallery hours are 9 a.m.-5 p.m., Monday through Thursday and 9:30 a.m.-5 p.m., Friday.

Capuano Gives Old Spanish New Twist

Thomas Capuano

In fourth century Rome, the scholar Palladius wrote a treatise on agriculture. More than 1,000 years later, the Latin text was transcribed into Old Spanish. After six centuries, the original Old Spanish version of Palladius' work has been

translated back into the medieval language by an NMSU faculty member.

Thomas Capuano, assistant professor of foreign language, began this lingual work in January. Capuano received a \$3,000 summer research grant from the University to help him finish editing the Castilian translation, the only one in existence. The 14th Century work has never before been edited.

When the medieval editors translated the Latin treatise, two copies were transcribed—one by the man who originally translated the paper and another by a scribe who merely copied the document. After the first copy couldn't be found, the remaining manuscript lost something in the translation. Not necessarily a learned man, the scribe who recopied the Old Spanish version made grammatical as well as contextual errors.

During this past summer, Capuano corrected the errors within the 250 folios of the manuscript. Capuano consulted the current edition of

Palladius' *Opus Agriculturae* in Latin to try to decipher how the contents of the paper should actually be translated. The Spanish instructor didn't encounter a personal language barrier by working with the manuscripts; Capuano speaks only a few languages but can read several. Though it takes time and a multilingual background to edit the translation, this is one chore Capuano gladly accepted.

Originally, Capuano wrote to the Hispanic Seminary of Medieval Studies at the University of Wisconsin-Madison, informing them of the existence of several manuscripts he discovered while completing work on a glossary of agricultural terms. The seminary knew of them and offered him the job of editing one for a series of editions of scientific treatises the organization plans to publish.

The manuscript represents the oldest source of agriculture in the Old Spanish language. Capuano's work is the first and only edition of the surviving manuscript.

Pryor Elected MBA President

Richard Pryor has been elected president of the Missouri Bankers Association.

The Missouri Bankers Association is a professional association which provides legislative representation, educational programs and other services for approximately 97 per-

cent of the state's banks. Pryor will serve a one-year term as president, completing a three-year progression from vice president to president-elect to his present position.

Pryor is also serving a two-year term as a member of the Board at NMSU. He was appointed by Gov. John Ashcroft in 1986.

Since 1973, Pryor has held his current position at the Bank of Jacomo. He is also chairman of the board for Ray County Bank in Richmond, Mo., and a board member for Individual Assurance Co., of Kansas City, Mo.

He is currently business chair-

man for the Cancer Crusade of Blue Springs, Mo.; a member and past president of the Blue Springs Chamber of Commerce; a member, past president and past district treasurer of the Blue Springs Rotary Club; an advisory board member to the Community Bankers Council of the American Bankers Association; a member of the Bank Administration Institute; a member and past president of the Performing Arts Council of Blue Springs; and a board member of the gubernatorially appointed Missouri Agricultural and Small Business Development Commission.

NMSU Senior Participates in National Leadership Program

Senior Jill Benton was one of 50 students chosen from more than 1,200 students across the country to participate in Leadership America, a national leadership development program for college students. The new program, which took place for the first time this summer, is sponsored by the International Leadership Center. Criteria for selection included an application, letters of recommendation and four written essays.

The Leadership America program provided students with a \$3,000 stipend and consisted of six separate components. First, the students traveled to Duke University in Durham, N.C., for an introductory session. Next, they went to the Center for Creative Leadership in Greensboro, N.C., where the week's activities included self-assessment exercises. From the East Coast, the program moved westward to Colorado Outward Bound in Leadville, Colo., for the Executive Leadership Program designed for corporate executives. This part of the program stressed building self-confidence and understanding of the group process. The fourth component was held at Southern Methodist University in Dallas,

"They never once said 'these are the eight characters of a leader.' That's just not the way it is."

where students attended classes and lectures given by successful leaders. For the next four weeks, the students were scattered throughout the nation and some in foreign countries for individual internships. Benton chose to intern in St. Louis, Mo., at Westward Textile Products. The program's closing session was held in Washington, D.C.

According to the International Leadership Center, Leadership America "is built on the premise that the next generation of American leadership—today's college students—can be provided insights and skills that will encourage them to assume leadership responsibilities earlier in their careers and en-

able them to be more effective in those efforts."

Benton credits the program with revealing her own strengths and weaknesses as a leader.

"It [Leadership America] helped me become aware of a lot of things, especially about myself," Benton said. "They never once said 'these are the eight characters of a leader.' That's just not the way it is. Those characteristics may be of one type of leader, but there are many types of leaders."

Although Benton stresses there are no set characteristics of a leader, she feels it takes "some skill, some adjustability, some strength and maybe a vision—you have to be able to see it before you can achieve it," she said.

Benton, a business administration major from Sullivan, Mo., has been a member of Student Senate, Student Ambassadors and the Undergraduate Council, and has been involved with the Baldwin Academy and the Japanese Cultural Studies and Exchange Program at the University. She is a Pershing Scholar and a member of the Student Activities Board, Delta Sigma Pi professional business fraternity and a leadership task force at Northeast.

Notables

Miles Lovelace, associate professor of education, has a biographical entry in the 1987 edition of the *The International Who's Who in Education*, published by the International Biographical Centre in Cambridge, England. Prior to coming to NMSU last May, Lovelace was a teacher, professor and administrator in American and international schools and colleges in Istanbul, Turkey; Beirut, Lebanon; Salonica, Greece; and Stavanger, Norway.

Patrice Thomsen, instructor of family sciences, has had her research article, "Adolescents' Beliefs About and Reasons for Using Vitamin/Mineral Supplement," published in the August 1987 issue of *The Journal of the American Dietetic Association*.
